

MD100x-xxT Series

Isolated, 1W SIP, High Temperature DC/DC Converters

Key Features:

- 1W Output Power
- -40°C to +105°C Operation
- 1,500 VDC Isolation
- Short Circuit Protection
- Single & Dual Outputs
- 18 Standard Models
- Miniature SIP Case
- Low Cost

RoHS

A 3.0 kVDC Isolation Model is Available See the MD100x-xxTI

Notes:

- The specified maximum capacitive load is for each output.
- Load regulation is measured over a range of 10% to 100% load.
- When measuring output ripple, it is recommended that an external 0.1 µF ceramic capacitor be placed from the +Vout pin to the -Vout pin, as shown in the typical connection diagram at right.
- With the addition of input filter components, all models will meet EN 55022 class B. A suggested circuit is shown in the connection diagram at right (components C2, L1). Contact the factory for more information.
- To meet the requirements of EN 61000-4-5, external components are needed. The typical connection at right shows the external components C1 and D1 that would typically achieve this. Contact the factory for more information.
- Operation at no-load will not damage the unit, but they may not meet all specifications.
- It is recommended that a fuse be used on the input of a power supply for protection. See the Model Selection tables for the correct rating.

Typical Connection

For applications that require meeting EMC standards, the diagram above illustrates a typical connection of the MD100x-xxT series. The units do not require external components to operate as specified. All components should be mounted as close to the unit as possible. Capacitors C3 & C4 are not required to meet specifications, but may be used if a lower level of output ripple is required. Capacitor C3 is a high frequency ceramic capacitor and C4 is an electrolytic.

Recommended values for components are:

Component	C1	D1	C2	L1	C3	C4
MD105x-xxT	1,000 µF/35V	3.0SMCJ9.0AG	1206, 4.7 µF/50V	6.8 µH	0.1 µF	10 µF
MD112x-xxT	1,000 µF/35V	3.0SMCJ18AG	1206, 4.7 µF/50V	6.8 µH	0.1 µF	10 µF
MD124x-xxT	330 µF/50V	3.0SMCJ28AG	1206, 4.7 µF/50V	6.8 µH	0.1 µF	10 µF
